

KnowbaseItem\getAnswer

KnowbaseItem\getName

getTranslatedValue

```
graph LR; A[KnowbaseItem\getAnswer] --> C[getTranslatedValue]; B[KnowbaseItem\getName] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two separate boxes: 'KnowbaseItem\getAnswer' (top) and 'KnowbaseItem\getName' (bottom). Both of these boxes have a blue arrow pointing towards a single box on the right labeled 'getTranslatedValue'. This suggests that both 'getAnswer' and 'getName' methods from the 'KnowbaseItem' class are associated with or mapped to the 'getTranslatedValue' method.
