

displayTabContentForItem

```
graph LR; A[displayTabContentForItem] --> B[canBeTranslated]
```

A diagram showing a dependency. On the left, a gray rectangular box contains the text 'displayTabContentForItem'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'canBeTranslated'. Both boxes have a thin black border.

canBeTranslated
