

xmlSerializeValue

```
graph LR; A[xmlSerializeValue] --> B[getValueType]
```

A diagram showing a call from the `xmlSerializeValue` method to the `getValueType` method. The `xmlSerializeValue` box is white with a black border, and the `getValueType` box is gray with a black border. A blue arrow points from the right side of the `xmlSerializeValue` box to the left side of the `getValueType` box.

getValueType
