

Entity\getSpecificValueTo
Display

getSpecificValueToDisplay

getTypeInquestName

```
graph LR; A["Entity\getSpecificValueTo<br/>Display"] --> C["getTypeInquestName"]; B["getSpecificValueToDisplay"] --> C;
```

The diagram illustrates a mapping or transformation process. On the left, there are two separate boxes. The top box contains the text 'Entity\getSpecificValueTo' on the first line and 'Display' on the second line. The bottom box contains the text 'getSpecificValueToDisplay' on a single line. Two blue arrows originate from the right side of these two boxes and point towards a single box on the right. This box contains the text 'getTypeInquestName' on a single line. The arrows indicate that the content of both left boxes is being consolidated or mapped to the single box on the right.
