```

The diagram illustrates a mapping from three different source identifiers to a single target identifier. Three light blue rectangular boxes on the left, each containing a text string, have blue arrows pointing from their right sides to a single, darker gray rectangular box on the right. The top box points to the top of the target box, the middle box points to the middle, and the bottom box points to the bottom. The target box is shaded gray and has a black border, while the source boxes are white with black borders.
