

countElementsInTableForEntity

countElementsInTableForMy  
Entities

getEntitiesRestrictCriteria

```
graph LR; A[countElementsInTableForEntity] --> C[getEntitiesRestrictCriteria]; B[countElementsInTableForMy Entities] --> C;
```

The diagram illustrates a relationship between three methods. On the left, there are two source methods: 'countElementsInTableForEntity' and 'countElementsInTableForMy Entities'. Both of these methods have blue arrows pointing to a single target method on the right, 'getEntitiesRestrictCriteria'. The target method is highlighted with a gray background, while the source methods have white backgrounds with black borders.
