

Line\rawSearchOptions

Profile\rawSearchOptions

getTypeName

```
graph LR; A[Line\rawSearchOptions] --> C[getTypeName]; B[Profile\rawSearchOptions] --> C;
```

The diagram illustrates that the `getTypeName` method is inherited from both `Line\rawSearchOptions` and `Profile\rawSearchOptions`. Two light blue arrows point from the respective boxes on the left to the `getTypeName` box on the right.
