getTypeName

```
graph LR; A[NetworkPortWifi\getSearchOptionsToAddForInstantiation] --> D[getTypeName]; B[NetworkPortWifi\rawSearchOptions] --> D; C[NetworkPortWifi\showInstantiationForm] --> D;
```

The diagram illustrates a mapping from three distinct network-related identifiers to a single 'getTypeName' operation. On the left, three white rectangular boxes with black borders are stacked vertically. Each box contains a text string representing a network identifier. Blue arrows originate from the right side of each of these three boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'getTypeName', indicating that all three identifiers on the left are associated with or mapped to this specific operation.
