

CompilerPassInterface

```
classDiagram
    class CompilerPassInterface {
    }
    class CachePoolClearerPass {
        +__construct(string $cachePoolClearerTag = 'cache.pool.clearer')
        +process(ContainerBuilder $container)
    }
    CompilerPassInterface <|-- CachePoolClearerPass
```

The diagram illustrates a class hierarchy. At the top is the 'CompilerPassInterface' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'CachePoolClearerPass' class, represented by a grey box with a black border. A blue arrow with a hollow triangular head points from the 'CachePoolClearerPass' class up to the 'CompilerPassInterface' class, indicating that 'CachePoolClearerPass' implements 'CompilerPassInterface'. The 'CachePoolClearerPass' class contains two public methods: '\_\_construct' and 'process'.

CachePoolClearerPass

```
+ __construct(string  
    $cachePoolClearerTag  
    ='cache.pool.clearer')  
+ process(ContainerBuilder  
    $container)
```
