

mustSuggestArgumentValuesFor

```
graph LR; A[mustSuggestArgumentValuesFor] --> B[getCompletionName]; A --> C[getCompletionType];
```

The diagram illustrates a relationship between a method and two other methods. A gray rectangular box on the left contains the text 'mustSuggestArgumentValuesFor'. Two blue arrows originate from the right side of this box. The top arrow points to a white rectangular box containing 'getCompletionName'. The bottom arrow points to a white rectangular box containing 'getCompletionType'. All boxes have a thin black border.
