

RRule\RRule\buildWeeknoMask

RRule\RRule\getIterator

RRule\RRule\occursAt

is_leap_year

```
graph LR; A[RRule\RRule\buildWeeknoMask] --> D[is_leap_year]; B[RRule\RRule\getIterator] --> D; C[RRule\RRule\occursAt] --> D;
```

The diagram illustrates a dependency or relationship where three methods from the RRule\RRule namespace (buildWeeknoMask, getIterator, and occursAt) all point to a single target, is_leap_year. The source methods are in white boxes, and the target is in a grey box. Blue arrows indicate the direction of the relationship.
