

Laminas\18n\Filter
NumberFormat\filter

filter

getFormatter

```
graph LR; A[Laminas\18n\Filter  
NumberFormat\filter] --> D[getFormatter]; B[filter] --> D;
```

The diagram illustrates a mapping or lookup process. On the left, there are two boxes. The top box contains the text 'Laminas\18n\Filter' followed by 'NumberFormat\filter' on a new line. The bottom box contains the text 'filter'. Two blue arrows originate from these boxes and point towards a single gray box on the right. The top arrow starts from the right side of the top box, and the bottom arrow starts from the right side of the bottom box. Both arrows converge towards the left side of the gray box, which contains the text 'getFormatter'.
