

GetCharWidth

```
graph LR; A[GetCharWidth] --> B[getRawCharWidth]; B --> C[getAbsFontMeasure];
```

A flowchart illustrating the sequence of font measurement functions. It consists of three rectangular boxes arranged horizontally. The first box, labeled 'GetCharWidth', is shaded gray. A blue arrow points from its right side to the second box, labeled 'getRawCharWidth', which is white. Another blue arrow points from the right side of the second box to the third box, labeled 'getAbsFontMeasure', which is also white. All boxes have a thin black border.
