

Gipi\Api\ApiRest\call

Gipi\Api\ApiXmlrpc\call

messageLostError

```
graph LR; A[Gipi\Api\ApiRest\call] --> C[messageLostError]; B[Gipi\Api\ApiXmlrpc\call] --> C;
```

The diagram illustrates a mapping from two different API call methods to a single error state. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Gipi\Api\ApiRest\call' and the bottom box contains 'Gipi\Api\ApiXmlrpc\call'. On the right, there is a gray rectangular box with a black border containing the text 'messageLostError'. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both API call methods can result in a 'messageLostError'.
