

prepareInputForAdd

prepareInputForUpdate

splitInputForElements

```
graph LR; A[prepareInputForAdd] --> C[splitInputForElements]; B[prepareInputForUpdate] --> C;
```

The diagram illustrates a flow where two separate input preparation steps, 'prepareInputForAdd' and 'prepareInputForUpdate', both feed into a single 'splitInputForElements' function. The first two boxes are white with black borders, while the final box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
