

RFC4180Field

```
+ const FILTERNAME
# array $search
# array $replace
# static string $force
  _enclosure

+ filter($in, $out,
        &$consumed, $closing)
+ onCreate()
+ static addTo(AbstractCsv
               $csv, string $whitespace
               _replace="")
+ static addFormatterTo
  (Writer $csv, string
   $whitespace_replace)
+ static register()
+ static getFiltername()
# isValidParams(array
                $params)
# isValidSequence(array
                  $params)
```
