

displaySpecificTypeField

getSpecificValueToSelect

displayFollowupsNumberBefore  
ResolutionField

```
graph LR; A[displaySpecificTypeField] --> C[displayFollowupsNumberBefore ResolutionField]; B[getSpecificValueToSelect] --> C;
```

The diagram illustrates a data flow where two separate input fields, 'displaySpecificTypeField' and 'getSpecificValueToSelect', both contribute to a single output field, 'displayFollowupsNumberBefore ResolutionField'. The output field is shaded gray, while the input fields are white with black borders. Blue arrows indicate the direction of the data flow from the inputs to the output.
