

split

```
graph LR; split[split] --> ignoreCase["Symfony\\Component\\String\\AbstractString::ignoreCase"]
```

The diagram illustrates a method call. On the left, a grey rectangular box contains the text 'split'. A blue arrow points from this box to a larger white rectangular box on the right. This white box contains the text 'Symfony\\Component\\String\\AbstractString::ignoreCase'.

Symfony\\Component\\String
AbstractString::ignoreCase
