

HeaderWrap

```
+ static wrap($value,  
    HeaderInterface $header)  
+ static mimeTypeEncodeValue  
    ($value, $encoding, $lineLength=998)  
+ static mimeTypeDecodeValue  
    ($value)  
+ static canBeEncoded  
    ($value)  
# static wrapUnstructuredHeader  
    ($value, HeaderInterface  
    $header)  
# static wrapStructuredHeader  
    ($value, StructuredInterface  
    $header)
```
