

validationError

```
graph LR; A[validationError] --> B["Swaggerest\\JsonSchema<br/>\\Constraint\\Format\\Uri<br/>\\unicodeValidationError"]
```

The diagram illustrates a class hierarchy. A gray box on the left contains the text 'validationError'. A blue arrow points from this box to a white box on the right. The white box contains three lines of text: 'Swaggerest\\JsonSchema', '\\Constraint\\Format\\Uri', and '\\unicodeValidationError'. This indicates that the 'validationError' class is a base class for the three classes listed in the right box.

Swaggerest\\JsonSchema
\\Constraint\\Format\\Uri
\\unicodeValidationError
