

write

```
graph LR; write[write] --> interface["Symfony\\Component\\Console\\Output\\OutputInterface<br/>writeln"]; style write fill:#808080,stroke:#333,stroke-width:1px; style interface fill:#fff,stroke:#333,stroke-width:1px;
```

The diagram illustrates the relationship between a method and its interface. On the left, a grey rectangular box contains the text 'write'. A blue arrow points from this box to a larger white rectangular box on the right. This white box contains the text 'Symfony\\Component\\Console\\Output\\OutputInterface' followed by 'writeln' on a new line, representing the interface to which the 'write' method belongs.

Symfony\\Component\\Console
\\Output\\OutputInterface
