compileCallable

```
graph LR; A["Twig\\Node\\Expression\\FilterExpression\\compile"] --> D["compileCallable"]; B["Twig\\Node\\Expression\\FunctionExpression\\compile"] --> D; C["Twig\\Node\\Expression\\TestExpression\\compile"] --> D;
```

The diagram illustrates the compilation of different Twig expression types into a callable. Three source boxes on the left, each representing a specific compile method (FilterExpression, FunctionExpression, and TestExpression), have blue arrows pointing to a single destination box on the right labeled 'compileCallable'. The destination box is shaded gray, while the source boxes are white with black borders.
