

countFor

```
graph LR; A[countFor] --> B[countElementsInTable]
```

A diagram showing a call from the function `countFor` to the function `countElementsInTable`. The `countFor` box is shaded gray, and the `countElementsInTable` box is white. A blue arrow points from the right side of the `countFor` box to the left side of the `countElementsInTable` box.

countElementsInTable
