

__construct

setOptions

setFallbackAutoloader

```
graph LR; A[__construct] --> B[setOptions]; B --> C[setFallbackAutoloader];
```

The diagram illustrates a sequence of three methods in a horizontal flow. The first method, `__construct`, is enclosed in a white box with a black border. A blue arrow points from this box to the second method, `setOptions`, which is also in a white box with a black border. Another blue arrow points from the `setOptions` box to the third method, `setFallbackAutoloader`, which is enclosed in a gray box with a black border. The boxes are arranged from left to right, indicating a sequential process.
