

calendarObjectChange

scheduleLocalDelivery

processCalendarChange

```
graph LR; A[calendarObjectChange] --> C[processCalendarChange]; B[scheduleLocalDelivery] --> C;
```

The diagram illustrates a data flow where two separate inputs, 'calendarObjectChange' and 'scheduleLocalDelivery', are processed together by a single function named 'processCalendarChange'. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
