

PhpArrayObject

```
classDiagram
    class PhpArrayObject {
    }
    class ArrayStack {
        +getIterator()
    }
    ArrayStack --|> PhpArrayObject
```

The diagram illustrates a class hierarchy. At the top is the 'PhpArrayObject' class, represented by a white box with a black border, divided into three horizontal sections. The top section contains the class name, while the two bottom sections are empty. Below it is the 'ArrayStack' class, represented by a gray box with a black border, also divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains the method '+ getIterator()'. A blue arrow with a hollow triangular head points from the top of the 'ArrayStack' box to the bottom of the 'PhpArrayObject' box, indicating that 'ArrayStack' inherits from 'PhpArrayObject'.

ArrayStack

+ getIterator()
