

glpi

```
graph TD; glpi[glpi] --> front[front]; glpi --> contenttemplates[contenttemplates]; glpi --> log[log];
```

The diagram illustrates the directory structure of GLPI. A large light blue rectangle with a dashed border represents the 'glpi' directory. Inside this rectangle, at the top, is the label 'glpi'. Below it is a solid black rectangular frame containing three sub-directories: 'front' on the left, 'contenttemplates' in the center, and 'log' on the right. The 'contenttemplates' and 'log' directories are highlighted with a blue background and a solid black border, while 'front' has a white background and a solid black border.
