

prepareInputForAdd

prepareInputForUpdate

checkParentSon

```
graph LR; A[prepareInputForAdd] --> C[checkParentSon]; B[prepareInputForUpdate] --> C;
```

The diagram illustrates a flow where two separate input preparation steps, 'prepareInputForAdd' and 'prepareInputForUpdate', both lead to a single 'checkParentSon' step. The first two steps are represented by white boxes with black borders, while the final step is a gray box with a black border. Blue arrows indicate the direction of the flow from left to right.
