getMatchingElementId

```
graph LR; A["Glpi\Console\Migration<br/>\\DomainsPluginToCoreCommand<br/>\\importDomainItems"] --> D["getMatchingElementId"]; B["Glpi\Console\Migration<br/>\\DomainsPluginToCoreCommand<br/>\\importDomains"] --> D; C["Glpi\Console\Migration<br/>\\DomainsPluginToCoreCommand<br/>\\importDomainTypes"] --> D;
```

The diagram illustrates a mapping from three source boxes to a single target box. The source boxes are arranged vertically on the left, each containing a file path. Blue arrows point from each source box to the target box on the right, which is labeled 'getMatchingElementId'. The target box is shaded gray, while the source boxes are white with black borders.
