

isInstalled

isUpdatable

getFromDBbyDir

```
graph LR; A[isInstalled] --> C[getFromDBbyDir]; B[isUpdatable] --> C;
```

The diagram illustrates a dependency structure. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'isInstalled' and the bottom box contains 'isUpdatable'. On the right, there is a gray rectangular box with a black border containing the text 'getFromDBbyDir'. Two blue arrows originate from the right side of the 'isInstalled' box and the right side of the 'isUpdatable' box, both pointing towards the left side of the 'getFromDBbyDir' box. This indicates that 'getFromDBbyDir' depends on both 'isInstalled' and 'isUpdatable'.
