

Exception

```
classDiagram
    class Exception {
    }
    class ClientException {
    }
    ClientException --|> Exception
```

The diagram illustrates a class hierarchy. At the top is the 'Exception' class, represented by a white box with a black border, divided into three horizontal sections. The top section contains the text 'Exception', while the two bottom sections are empty. Below it is the 'ClientException' class, represented by a gray box with a black border, also divided into three horizontal sections. The top section contains the text 'ClientException', and the two bottom sections are empty. A blue arrow with a hollow triangular head points from the top of the 'ClientException' box to the bottom of the 'Exception' box, indicating that 'ClientException' inherits from 'Exception'.

ClientException
