

\_\_invoke

```
graph LR; A[__invoke] --> B[getViewHelperConfig]
```

A diagram showing a call from the `__invoke` method to the `getViewHelperConfig` method. The `__invoke` method is represented by a white box with a black border, and the `getViewHelperConfig` method is represented by a gray box with a black border. A blue arrow points from the `__invoke` box to the `getViewHelperConfig` box.

getViewHelperConfig
