

Sabre\HTTP\Request  
    \_\_toString

Sabre\HTTP\Response  
    \_\_toString

getHeaders

```
graph LR; A["Sabre\HTTP\Request<br/>__toString"] --> C[getHeaders]; B["Sabre\HTTP\Response<br/>__toString"] --> C;
```

The diagram illustrates a relationship between two classes and a common method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Sabre\HTTP\Request' followed by '\_\_toString' on a new line. The bottom box contains the text 'Sabre\HTTP\Response' followed by '\_\_toString' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text 'getHeaders'.
