

render

```
graph LR; render[render] --> getInstance[Gipi\Debug\Profiler\getInstance];
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the word "render". A blue arrow points from the right side of this box to the left side of a larger white rectangular box on the right. Inside the white box, the text "Gipi\Debug\Profiler" is on the top line and "\getInstance" is on the bottom line.

Gipi\Debug\Profiler  
\getInstance
