

getInstantiationHTMLTable

```
graph LR; A[getInstantiationHTMLTable] --> B[HTMLTableRow\addCell]; A --> C[HTMLTableRow\getHeaderByName];
```

The diagram illustrates a call to the `getInstantiationHTMLTable` method, which results in two subsequent actions on an `HTMLTableRow` object: `addCell` and `getHeaderByName`. The initial call is represented by a grey box, while the resulting actions are shown in white boxes with blue arrows indicating the flow.

HTMLTableRow\addCell

HTMLTableRow\getHeaderByName
