

addArgument

```
graph LR; A[addArgument] --> B["Symfony\\Component\\Console\\Input\\InputArgument\\getName"]; A --> C["Symfony\\Component\\Console\\Input\\InputArgument\\isRequired"]
```

The diagram illustrates the `addArgument` method's relationship with two classes in the Symfony framework. A grey box labeled `addArgument` has two blue arrows pointing to two white boxes. The top white box contains the class `Symfony\\Component\\Console\\Input\\InputArgument\\getName`, and the bottom white box contains `Symfony\\Component\\Console\\Input\\InputArgument\\isRequired`.

Symfony\\Component\\Console  
\\Input\\InputArgument\\getName

Symfony\\Component\\Console  
\\Input\\InputArgument\\isRequired
