

Laminas\Validator\File  
\ExcludeMimeType\isValid

isValid

getHeaderCheck

```
graph LR; A["Laminas\Validator\File<br/>\ExcludeMimeType\isValid"] --> C[getHeaderCheck]; B[isValid] --> C;
```

The diagram illustrates a method delegation pattern. On the left, a box contains the text 'Laminas\Validator\File' followed by '\ExcludeMimeType\isValid' on the next line. Below this box is another box containing the text 'isValid'. On the right, a gray box contains the text 'getHeaderCheck'. A blue arrow points from the '\ExcludeMimeType\isValid' text in the top-left box to the 'getHeaderCheck' box. Another blue arrow points from the 'isValid' text in the bottom-left box to the 'getHeaderCheck' box.
