

HTMLTableCell__construct

HTMLTableSubHeader
__construct

copyAttributsFrom

```
graph LR; A[HTMLTableCell\__construct] --> C[copyAttributsFrom]; B[HTMLTableSubHeader\__construct] --> C;
```

The diagram illustrates a relationship between two class methods and a common method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'HTMLTableCell__construct' and the bottom box contains 'HTMLTableSubHeader' followed by '__construct' on a new line. On the right, there is a gray rectangular box with a black border containing the text 'copyAttributsFrom'. Two blue arrows originate from the right side of the top and bottom white boxes and point towards the left side of the gray box, indicating that both methods inherit from or utilize the 'copyAttributsFrom' method.
