

Twig\Node\Expression
\ConstantExpression\compile

Twig\Node\Expression
\NameExpression\compile

repr

```
graph LR; A["Twig\\Node\\Expression\\ConstantExpression\\compile"] --> D[repr]; B["Twig\\Node\\Expression\\NameExpression\\compile"] --> D;
```

The diagram illustrates a relationship between two compile methods and a common representation method. Two boxes on the left, one for `ConstantExpression` and one for `NameExpression`, both have arrows pointing to a single `repr` box on the right.
