

countForDomain

```
graph LR; A[countForDomain] --> B[countElementsInTable]
```

A diagram showing a mapping from the text 'countForDomain' to 'countElementsInTable'. The text 'countForDomain' is inside a gray rectangular box with a black border. A blue arrow points from the right side of this box to the left side of another rectangular box. The second box is white with a black border and contains the text 'countElementsInTable'.

countElementsInTable
